- 1 Be it enacted by the Senate and House of Representa-

- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Communication and

- 7 SEC. 2. FINDINGS.
- 8 Congress finds the following:

- 1 (1) The National Park System manages 392 2 sites that cover more than 83 million acres.
  - (2) According to the National Park Service, there were 275,581,547 recreational visits to National Park System sites in 2007, which marks an increase of nearly 3 million visits from 2006.
    - (3) The number of recreational visits specified in paragraph (2) does not include Forest Service, Bureau of Land Management, Bureau of Reclamation, or Army Corps of Engineer sites or include State and local parks, which also cover a significant land area.
    - (4) For example, in California, over 79.5 million people visited California State Parks, over 1.3 million acres of land, in the 2007/2008 fiscal year.
    - (5) Many State and local park systems, including the California Department of Parks and Recreation, have no emergency notification system suitable for use on public recreational lands to warn persons using such lands of imminent emergency situations.
